EXTEND THE LIFE OF YOUR FLOORS

Proper Maintenance will reduce costly restoration.

ROUTINE MAINTENANCE

Dust mop with cotton & dustmop treatment daily. For wet-tacking, use a diluted solution of Squeaky™ Concentrate with court clean bar and towel. Periodically, autoscrub with Squeaky™ Concentrate and use a clean microfiber or white buffing pad with a light head pressure.

INTERIM MAINTENANCE

When the finish dulls, it may be time to recoat with the TyKote® Recoating System. TyKote® saves time, labor, and materials by ensuring adhesion of the topcoat and reducing floor prep time. Return to play with in 48 hours.

RESTORATIVE MAINTENANCE

Over time, traffic and soils take their toll on the finish. When routine and interim maintenance procedures no longer produce the desired results, the floor should be sanded and finished by an experienced wood floor contractor that can be recommended by your Account Executive. Basic Coatings has a full line of wood floor finishes and sealers.

DUST-FREE RECOATING SYSTEM

STEP 1: PREP & CLEAN

I.F.T. provides unsurpassed cleaning in heavily soiled areas. Squeaky is then used to remove residue and prepare the floors.

STEP 2: BOND

Tykote is the most revolutionary way to prepare wood floors for recoating. Its exclusive properties act as a bonding agent between the existing floor and the new topcoat.

STEP 3: FINISH

Streetshoe NXT offers unmatched beauty and durability. The flexibility of the TyKote System enables it to be used with any Basic Coatings water-based urethane finish.
