

Jet H2 Ultra

Disinfection at your fingertips.

CORDLESS
*
PORTABLE
*
EASY-TO-USE

ByoPlanet's® Jet H2 Ultra is the first professional handheld spraying device that features induction-charged technology in the fight against illness-causing bacteria and viruses.

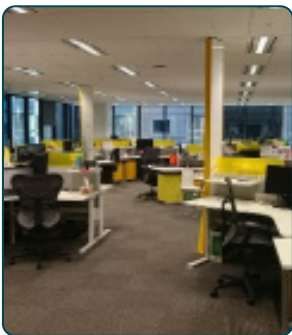

With the same germ-killing power as corded sprayers, this cordless, portable device allows the user to be completely mobile for maximum convenience.

The nozzle in the Jet H2 Ultra uses an innovative, unique air jet to atomize and deliver the spray reliably, safely with very few moving parts since a liquid pump is not needed. The sprayer has been tested and proven to produce more surface coverage per square foot on both the front and back side of objects than similar products in the market who only cover the front. The Jet H2 Ultra allows the disinfectant to fully wrap – 360 degrees – around objects and cling to surfaces that are normally missed, which increases efficiency and drastically reduces human error.

* * *

The Jet H2 Ultra is light and easy-to-use making disinfecting effortless.

Applications for use:

*
Overall office disinfecting – cubicles, bathrooms, floors, common areas.

*
Gym/ equipment.

*
Carpets, rugs, drapes.

*
Schools – Reduction in absenteeism especially during cold & flu season.

*
Restaurants – Disinfection of FOH and BOH. Targets odor at the source.
