# Clorox EcoClean Protected by Clorox. Powered by Nature.\*

*Clorox EcoClean Portfolio Brochure*

\*Cleaners made with at least 94% plant-based cleaning ingredients. Disinfectants made with plant-based active ingredients.

# Clorox EcoClean

## Plant-Based Cleaning & Disinfecting

Clorox EcoClean products are designed for cleaning professionals seeking eco-conscious cleaners and disinfectants to help keep facilities clean and healthy while using EPA Safer Choice and Design for the Environment-certified ingredients.

The Clorox EcoClean portfolio includes ready-to-use Disinfecting Wipes, Disinfecting Cleaner, All Purpose Cleaner and Glass Cleaner—all designed with facilities, people, and the planet in mind.

## Third-Party Certified

The below certifications provide confidence that products have been independently reviewed and meet strict environmental and safety standards. EPA Safer Choice, EPA Design for the Environment and USDA Biobased are certifications awarded to products that have been voluntarily submitted for full ingredient review and meet the criteria of each program.

**Safer Choice:** EPA's Pollution Prevention (P2) program and cleaning product certification includes practices that reduce, eliminate, or prevent pollution at its source, such as using safer ingredients in products. Participation in the Safer Choice program is voluntary. Companies who make products carrying the Safer Choice label have invested heavily in research and reformulation to ensure that their products meet the Safer Choice Standard.

<https://www.epa.gov/p2>

<https://www.epa.gov/saferchoice/standard>

**Design for the Environment (DfE):** EPA's DfE logo helps consumers and commercial buyers identify antimicrobial products that meet the health and safety standards of the pesticide registration process required by the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as well as other rigorous criteria required by the agency. When a consumer or purchaser sees EPA's DfE logo on a product, they can feel confident that the product meets stringent EPA criteria for efficacy and effects on human health and the environment.

<https://www.epa.gov/pesticide-labels/learn-about-design-environment-dfe-certification>.

**USDA Biobased:** The USDA Biobased label assures a consumer that the product contains a verified amount of renewable biological ingredients (referred to as biobased content). Consumers can trust the label to mean what it says because manufacturer's claims concerning the biobased content are third-party certified and strictly monitored by USDA.
