Microfiber is a very fine synthetic fiber composed of 80% polyester and 20% polyamide (nylon).

This creates a fiber that is **100 times finer** than human hair. This dense construction creates a split microfiber that is positively charged and attracts negatively charged dust particles.

Testing shows many advantages to using O-Cedar Commercial's microfiber products:

- **REMOVE** over 95% of microorganisms using our microfiber wet mopping pad compared to 65% when using a traditional loop-end mop.
- **REDUCE** chemical consumption by up to 90% by using far less chemicals than traditional mops require.
- **REDUCE** workplace injuries because our microfiber products require less heavy lifting and movement than traditional cleaning tools.
- **REMOVE** up to 75% more dust and dirt as our microfiber dust mops clean more effectively than traditional cotton dust mops.
- **REACH** hidden dust and dirt in crevices that ordinary fibers simply pass over.
- **LAUNDERABLE** up to 500 times while withstanding up to 200 degree water for bleach-free laundering.

All O-Cedar Commercial® Microfiber Pads have microfiber liners, preventing the bacteria and odor that occur with sponge liners.

MaxiPlus® Microfiber Pads

- Pad picks up 75% more dirt and dust per swipe than traditional mops
- Pad absorbs seven times its weight in liquid for all mopping procedures
- Save more and waste less with this removable pad that can be laundered up to **500 times**
- Continuous reinforced sewn edges eliminate fraying for extended use
- Colored tabs prevent cross-contamination

MICROFIBER CART

Our high-capacity microfiber cleaning cart neatly stores and transports your essential tools and supplies. Its innovative dual bucket functionality for effective floor and surface cleaning prevents bacteria and dirty water from entering the sanitization process and the color-coded features significantly minimize cross-contamination.

The MaxiPlus® **Microfiber Cart** is the essential solution to strengthen your microfiber program!

- Open design for easy access; non-rusting, extremely durable steel construction
- Sliding middle shelf provides convenient access and locks securely for transport
- Maneuvers easily in confined areas; 5" non-marking swivel casters
- Rear casters have foot-activated, top-locking brakes to secure and prevent movement
- Flexible plastic tool holder secures handles of any diameter; perfect for our MaxiPlus® All-in-One Cleaning System
- Convenient hook to store wet floor sign
- Plastic Buckets for MaxiPlus® Microfiber Cart sold separately (#6930)
- Assembled Dimensions:
Cart only: 35" x 27½" x 41"
Cart with buckets: 35" x 30" x 42"

Plastic Buckets

FOR MAXIPLUS® MICROFIBER CART

- Four, 5.5-quart buckets w/lids & color-coded handles separates clean & used cloths; ideal for MaxiPlus® Microfiber Cloths. **For use on top shelf.**

- Two, 9-quart buckets for various cleaning supplies & chemicals; ideal for MaxiPlus® All-In-One Refill Bottles. **For use on middle shelf.**

- Two, 18-quart charging buckets w/lids separate clean & used flat mopping pads, ideal for MaxiPlus® Microfiber Wet Mopping Pads. **For use on bottom shelf.**

- MaxiPlus® Microfiber Cart sold separately (Item #96930)

MaxiWash™ Disposable Wiping System

MaxiWash™ Disposable Wiping System is a safer alternative to hazardous open buckets of chemicals!

- Works with any sanitizers, bleach or disinfectants
- Allows for a more controlled dispensing and application process
- Single-Use wipe reduces cross-contamination and eliminates laundering infected cloths
- Perforated Center-Pull rolls will not mold, mildew, lint or leave behind residue
- 96924: 12" x 12" untreated wipes; 6 rolls x 90 wipes per roll = 540 total wipes
- 96923: 5½" x 7" untreated wipes; 6 rolls x 500 wipes per roll = 3,000 total wipes
- 5-quart Bucket with secure dispensing lid eliminates exposure to chemical vapors and splashes
- Includes self-adhesive labels to designate chemicals and instructions for use
- 96925: case contains; 5 buckets & 5 dispensing lids

Complex woven texture for commercial use

Complex woven texture for commercial use

Back of the pad design

Our commitment to **MADE in the USA** has never been stronger.

We have invested millions of dollars and countless hours to manufacture our products efficiently in the United States.

To us, Made in the USA is so much more than a tagline. It means Americans are at work, and we are strengthening our economy, saving on shipping costs, and keeping people working in our communities across America.

We are proud of the steps we have taken this past decade and look to further expand on the "**Made in the USA**" brand that has made us a leader in this important endeavor.

Mop Size Identified by Band Color

Construction

Loop-End Mops

Will not fray or ravel with use like cut-end mops. Can be laundered for better effectiveness and clean appearance. With proper laundering, mop will last 8 to 10 times longer than a cut-end mop, ultimately making it a more economical choice.

Cut-End Mops

Economical for general purpose floor cleaning. Not launderable, so the product life is relatively short. Tends to "lint," lose strands and leave uneven gaps on floor surfaces.

Screw-On Mops

A plastic injection-molded cap that incorporates a metal threaded stud and accepts any standard screw-on handle. Designed for the mop to lay on the floor for more efficient mopping.

Connector Mops

A plastic injection-molded cap that incorporates a threaded insert and accepts any standard threaded handle. Designed for the mop to lay on the floor for more efficient mopping.

Headband

5" PVC coated mesh headband is secured to the mop with 6 rows of lock-stitching and back-tacked to properly secure headband to mop. The mesh headband offers greater durability and allows the yarn to dry thoroughly.

Tailband

A woven 1/2" tape sewn toward the bottom of the mop to secure the yarn and prevent tangling. Cleans 50% more floor per stroke and mops evenly without leaving gaps for faster mopping and lower labor cost. Standard on all loop-end mops.

Shrinkless

Synthetic blended fibers inhibit the growth of bacteria, mold, mildew, and fungi that cause odors, stains, and shorten product life

Important Factors to Consider

Absorbency

The absorbency of a mop refers to its ability to pick up and hold liquid. Higher levels allow floors to dry faster, leading to greater productivity and worker safety. Microfiber, Cotton/Synthetic blend, and Cotton yarns have the highest absorbency.

MaxiSorb®

MaxiClean®

MaxiCotton®

Durability

The durability of a mop is a measure of how long it will perform before needing to be replaced. Microfiber, Synthetic Blend, and Cotton/Synthetic Blend mops are the most durable. Mops with anti-microbial fibers have greater durability because they inhibit the bacterial growth that causes mop odor, discoloration, and mildew that breaks down the fiber.

MaxiPlus® MF

Shrinkless

Premium™

Launderability

The launderability of a mop is based on the number of commercial washing and drying cycles it can withstand before the construction of the mop is degraded or the performance declines. Microfiber, Cotton/Synthetic Blend, and Synthetic Blend mops have the highest levels of launderability.

MaxiPlus® MF

Premium™

Shrinkless

Release

Release is the ability of a mop to disperse liquid onto the floor or during wringing. Higher levels allow faster and more complete wringing, as well as more efficient application of cleaning solutions on the floor. Microfiber, Synthetic Blend, Rayon yarns offer the best release of liquids.

MaxiPlus® MF

Private Label

Customize wet mops by having your desired information printed in black on your tag. Your tag is sewn into the mop and then the mop is placed in a clear polybag - your “private labeled” mop.

- Add “-PL” to end of item number

Mop Size Identification Chart - By Band Color

Headband Color	Loop-End Size
Yellow.....	Small
Green.....	Medium
Red.....	Large
Blue.....	X-large

Sizing

Wet mop sizing is important to overall mopping efficiency. A wet mop should be sized both to the person who will be mopping and to the mop wringer with which it will be used. Most mops are sized according to the weight of the yarn they contain. Blended mops have made this sizing method confusing and obsolete because a lighter-weight blended mop can pick up more water than a heavier, all cotton mop. Therefore, loop-end blended mops are sized according to their pickup capability and the wringer size they will fit rather than yarn weight.

Co-Brand

Customize wet mops by having your information printed in black on your tag. Your tag is sewn into mop and your “private labeled” mop is then placed in an O-Cedar Commercial attention-grabbing three-color polybag. • Add “-PCB” to end of item number

- Loop-End Mops only

Flat-Pak™ and Overwrap Mop Packaging

Nexstep Commercial Products (exclusive licensee of O-Cedar®) offers two unique, environmentally-friendly, mop packaging options – our exclusive Flat-Pak™ Cartons & Overwrapped Bundles.

Flat-Pak™ Mop Cartons reduce the size of a standard mop carton by 45% saving valuable space for our customers. Individual mops are inserted in poly bags and the air is removed to compress flat. In addition...

- With state-of-the-art engineering, our cartons use the least amount of corrugated material while providing superior product protection
- All of our cartons are made of 100% recycled pulp reducing the waste going into landfills and conserving natural resources

Overwrap Mop Packaging eliminates the cardboard entirely, which can significantly lower your price per mop. In addition...

- Compact packaging creates less waste
- Eliminates all corrugated materials
- Comprehensively tested to ensure outstanding product protection in transit and, unlike a brick pack, does not damage the fibers
- Wet mops retain their appearance, stack easily and are more convenient to receive, store, and inventory

O-Cedar Commercial mops perform directly out of their packaging with both options. Private labeling is available with either packaging option, and your private labeled mop tag is always sewn into the mop head.

Microfiber

Attracts dust particles, removing up to 75% more dust and dirt than traditional cotton mops. Reaches into crevices that ordinary fibers pass over. Uses far less chemicals. Can be laundered up to **500 times**.

Rayon

Contains no pepper trash or oils. Used primarily in special applications such as floor finishing. While offering extremely high water pickup, has relatively low water retention, making it less effective for general purpose mopping.

Nylon

The ultimate mop for applying floor finish. Tightly spun nylon yarn glides along the floor surface with less drag, greatly reducing worker fatigue while evenly distributing finish.

Synthetic Blend

Made from a combination of rayon, polyester, and acrylic fibers. Great for dispensing chemicals and liquids. Highly absorbent, picking up 3-4 times its weight; little "break-in" required. Will not mold or mildew. Less linting than many other blended fibers.

Cotton/Synthetic Blend

Combines high on-floor performance with long product life. Cotton fibers provide high water absorption and retention for effective floor drying. Synthetic fibers such as rayon afford maximum water pickup and require no "break-in." Other synthetic fibers such as polyester give increased strength and long product life.

Cotton

Effective and economical for general floor cleaning. High absorbency allows fast floor drying. Susceptible to mildew that can rot mop yarn and shorten product life. "Break-in" needed to remove natural oils and gain full absorbency of mop.

MaxiPlus® Microfiber Loop-End Mops

- Split microfiber provides unmatched cleaning performance attracting more dirt than traditional mops
- Floors dry faster with non-streaking microfiber and use substantially less cleaning agent than traditional mops
- Save more and waste less with this mop that can be laundered up to **500 times**
- Rubberized 5" mesh headband allows for excessive laundering
- Tailband allows mop to spread evenly on the floor to cover more surface area and reduce labor
- Color-coded for use segregation

The leading trend of future cleaning, Nexstep Commercial Product's PET fibers, used for angle brooms and brushes, are made from recycled PET materials. The P.E.T. stands for polyethylene terephthalate and contains content made of recycled plastics such as water bottles. Benefits of using this recycled plastic include:

- Reduces pollution
- Consumes less energy and protects natural resources
- Saves depleting landfill space

Biodegradable Materials

Many of our items are made with recyclable materials, including the vast majority of the yarn used in manufacturing our wet mops. The yarn is made from 100% Post Industrial Waste making it completely biodegradable. Environmental advantages include:

- Made from renewable resources
- Produces far less pollution
- Compostable - decompose naturally over short periods of time

MaxiPlus® Professional Angle Brooms

- Extra wide 14" sweeping surface cleans larger areas in less time
- Solid block, meaning no chance of separation from shroud
- Deep thread insert prevents breaking of handle tip
- Sturdy 48" x 1" steel handle will not crack, warp, or splinter
- Fully washable, long-lasting synthetic bristles will not wear down, break, or fall out like conventional corn bristles
- Flagged PET bristles sweep the finest particles; great for front-of-the-house use in food service
- Unflagged PET bristles prevent ends from matting together; great for back-of-the-house use in food service
- 7" long fiber
- 91353: Includes extra wide 14" dust pan

Natural Bristles

Horsehair

Produced from the tail and the mane, the soft horsehair comes in black and gray. Horsehair is used in a variety of brushes due to its durability. Should not be used on wet or oily surfaces.

Palmyra

Natural medium stiff fibers from the palmyra palm. Extremely durable, brown in color, has good bristle bend recovery, is economical and tough, and is an excellent choice for general sweeping. Can be used wet or dry.

Tampico

Soft to medium stiff fiber from the agave plant. Durable and retains shape after continual use. Highly resistant to heat, alkalis, solvents, and acids. Has excellent water retention and will maintain stiffness while wet.

Broomcorn

The broomcorn fiber comes from the tassel of the sorghum stalk. Broomcorn lasts longer and sweeps better because each fiber is covered with hair-like follicles that trap and hold dirt particles. It is water-resistant and wears very well, making it the premium broom fiber. It is suitable for any floor surface.

Rattan

Similar to bamboo in appearance, rattan provides stiffness in a broom when placed inside with layers of quality broomcorn on the outside. Excellent for use in wet areas.

Yucca/Sotol

Corn/yucca blend brooms are constructed of broomcorn and yucca fibers from the yucca plant. Yucca is a member of the agave plant family. The stiff fibers are used to make the broom's core, which is then wrapped with a layer of broomcorn. This makes a strong broom suitable for sweeping on concrete.

Synthetic Bristles

Nylon

A flexible, silky synthetic fiber that has a very high heat tolerance – up to 350° F. Very durable and excellent abrasion resistance. Will not stain, mat, discolor, or absorb odors. Excellent for food service.

Polyester

Excellent chemical resistance and bristle bend recovery. Very good abrasion resistance and tear/break strength. Sustains temperature up to 400° F.

Polystyrene

This fiber is highly resistant to acid and detergents. Polystyrene has excellent flexibility and wear durability. Should not be used with sweeping compounds.

Polypropylene

Available in many colors and weights for different applications. Resistant to acids, oils, fungi, and bacterial growth. Sustains temperatures up to 225° F. An excellent synthetic fiber for food service, and also perfect sweeping or scrubbing takes place on wet or dry surfaces.

PET

Waterproof; dries quickly. Resistant to acids, oils, and bacterial growth. Ends are often flagged (Feather Tip™) to provide a soft brushing face that picks up fine dust particles. Excellent for food service, and also perfect where sweeping or scrubbing take place on wet or dry surfaces.

Polycorn

Made from polypropylene which gives good sweeping performance indoors or outdoors. The thicker fibers are long wearing, don't absorb water, and are resistant to most chemicals, detergents, and mildew. Especially good in damp environments and can even be used on low-pile carpet.

Blocks

Hardwood Blocks

Quality natural lacquered hardwood blocks provide classic, traditional durability and dependability. Two threaded or tapered holes provide long product life.

Structural Foam Blocks

These non-absorbent plastic blocks are made with fine synthetic cellular core surrounded by a solid skin. Lighter in weight, these blocks will not crack, split, warp, or house bacteria.

Fill Design

Staggered hole patterns prevent gaps in fill material for better performance. Dense fill leads to longer life. Flagged tips pick up fine dust and debris. Flared ends allow access to corners.

ProSweep™ Combo

- 3" flagged gray polystyrene border controls dust and an unflagged medium stiff black center loosens dirt
- Constructed with two durable bristles to remove dirt and control dust
- Steel bolt design eliminates loose handle connection
- Extra thick 1½" **hardwood block**
- Brace sold separately (Page 75)

Terms & Conditions

General:

- All orders are subject to approval by Nexstep Commercial Products.
- Prices are subject to change without notice.
- Prices charged will be the prices in effect at the time the order is placed.

Minimum Order/Freight Terms:

- Minimum order is \$500. Any order less than \$500 will be assessed a \$30 service charge, except backorders.
- Minimum opening order for a new customer is \$1,200
- East of Rockies, shipments of \$2,000 or more, FOB Origin/Freight Prepaid, via carrier of our selection within the 48 contiguous states. Under \$2,000, FOB Origin/Freight Collect.
- West of Rockies, shipments of \$2,600 or more, FOB Origin/Freight Prepaid, via carrier of our selection within the 48 contiguous states. Under \$2,600, FOB Origin/Freight Collect.
- For redistributors, shipments of \$5,000 or more, FOB Origin/Freight Prepaid, via carrier of our selection within the 48 contiguous states. Under \$5,000, FOB Origin/Freight Collect.
- Accessorial delivery and detention charges are the responsibility of the receiver.
- Claims for shortages or damages must be made to Nexstep Commercial Products within 72 hours from date of receipt of shipment, any shortage must be signed and communicated to Nexstep Commercial Products' Customer Service Dept.
- Credit memos expire after 180 days. Please specify credit memo number on remittance advice to apply.

Add-On Orders:

An add-on must be received within 24 hours of the original order to guarantee shipment together. If an add-on must be shipped separately, the customer will be responsible for the additional freight charges.

Non-Preferred Carrier:

Nexstep Commercial Products reserves the right to determine the most economical routing of all prepaid shipments. Nexstep Commercial Products will not pay for special service fees such as "sort and segregate" or "call for delivery appointment." Prepaid freight includes dock to dock shipping only. Call our Customer Service Dept. for quotes on services such as driver or lumber unload, sort & segregate, lift gate service, or prison/residential/inside deliveries, etc. Additionally Nexstep Commercial Products will not be liable for any additional charges that may be incurred by using a non-preferred carrier.

Payment Terms:

Net 30 days. Orders are invoiced the day they ship from our distribution center in Paxton, Illinois and payment is due within 30 days of the invoice date. Interest of 1.5% per month will be charged on any open balance exceeding 30 days.

Credit

To establish credit, call our Accounting Department at 937-322-5163 or print Credit Application from our website at www.ocadoarcommercial.com

Returned Goods Policy:

Merchandise will be accepted for credit only with prior approval from Nexstep Commercial Products. Authorized returns will only be accepted in unopened original cartons, freight prepaid by the customer, and require a 20% restocking fee. Private labeled, discontinued, or customized merchandise cannot be returned for credit. Returns must have RMA#; contact Customer Service Dept. at 937-322-5163 prior to return for an RMA#.

Private Label:

At Nexstep Commercial Products, wet mops may be customized with a minimum order (per item#) of 12 dozen (cut-end and loop-end mops). Private labeling may be available for other items, please inquire with our Customer Service Department.

Bids:

Nexstep Commercial Products reserves the right to provide bid pricing to only Authorized Distributors. All Authorized Nexstep Commercial Products Distributors must use stock pricing on invoices. To receive rebate for bid pricing, distributors must submit POD documentation and the Nexstep bid number.

Credit Cards:

We accept Visa, MasterCard, and American Express. There is no convenience fee on any order paid by credit card at the time the order is placed. However, there is a 2.5% convenience fee on any order paid by credit card after the order has been shipped.

Warranty Statement:

Nexstep Commercial Products will replace or repair any defective product within a year of the purchase date. To report a defective product, please contact customer service at 937-322-5163. Nexstep Commercial Products may request a proof of purchase to arrange a repair or replacement. The warranty is void if a product suffers misuse, abuse, modification, or failure to follow instructions. The warranty does not apply to nondurable goods.

Back-Order:

All backordered products of regular weight and size will be shipped prepaid. Anything defined as oversized by ground carriers, will ship to the customer prepaid if they can add items for a \$750 order East of the Rockies, or \$900 West of the Rockies. This prevents product from being damaged. If minimum cannot be met, customer is responsible for freight charges.
