Pariser's total concept Liquid Laundry System™ (LLS) brings unmatched industrial expertise to the on-premise laundry

Pariser prides itself on:

- Dedication to quality chemicals and service requirements.
- Products that are proven to deliver results.
- Utilizing the latest technology to formulate customized systems.
- State-of-the-art equipment design.
- Providing production expertise sensitive to linen and energy demands.
- The most varied and versatile liquid product line on the OPL market today.

**Cost-free total concept consulting service
from our experienced technical staff**

The Pariser technical staff will analyze your operation thoroughly and recommend the most efficient and cost-effective system for you. Their suggestions will:

- Improve equipment utilization
- Reduce boiler time and operation time
- Improve washroom procedures
- Better manage energy and labor consumption
- Revamp production systems from soil room to clean shelf

Laundry Products That Work With LLS

BOOSTER PLUS

Heavy-duty alkaline builder for medium- to high-hardness water conditions and where higher titration values are imperative.

PX-70

Highly concentrated, multi-purpose synthetic liquid laundry detergent.

STAINEX

Highly concentrated 15% stabilized liquid chlorine-type bleach.

OXI-LYTE

Concentrated liquid hydrogen peroxide-based laundry bleach, safe on fabrics of all type and color.

Why the Pariser LLS hands-off system is right for you

The Pariser liquid laundry injection system (LLS) is automatic and feeds directly into your washing machine. It allows you to add the right chemicals in the right proportion at the right time – every time. Because liquid products dissolve instantly, there's no delay in wash action. Pariser LLS assures linen is washed consistently clean and bright.

This hands-off, maintenance-free system streamlines your on-premise laundry operation and reduces related washroom costs.

Additionally, Pariser LLS offers you a choice of the system type that is best for you – from 1-, 2-, 3- to 6-product systems, including EPA-certified green product alternatives. They are designed to serve any size washing machine, soil classification, or water conditions.

How LLS saves you money

Maximizes product use

No undissolved solid particles of cleaning products left on your finished work or in your supply hoppers.

Reduces waste

Pariser LLS uses a performance-rated peristaltic pump for precise chemical measurement – no mixing, no measuring, no guessing.

Extends linen life

Controlled proportioning eliminates excessive alkali and over-bleaching.

Lowers labor costs

Minimizes washwheel supervision and frees laundry workers for other duties.

Increases safety

Less handling of chemical products means fewer spills and fewer injuries.

Reduces product loss

Pariser provides a variety of product container sizes for ease of disposing and handling: 2 1/2-gallon totes, 5-gallon pails, 15- and 55-gallon drums. Larger containers reduce switching and waste. You'll need less storage area, have greater inventory control, and virtually eliminate theft.

Your Pariser Industries representative can show you the LLS way to modernize and economize. Call 800-370-SOAP (7627) or email info@pariser.net.

CITRASOL

Carefully selected blend of citrus terpenes, anionic, and non-ionic biodegradable synthetic detergents.

SOUR RR

Concentrated liquid rust removing sour.

FABRI-SOFT

Multi-functional fabric softener and neutralizing agent for use on all types of fabrics.

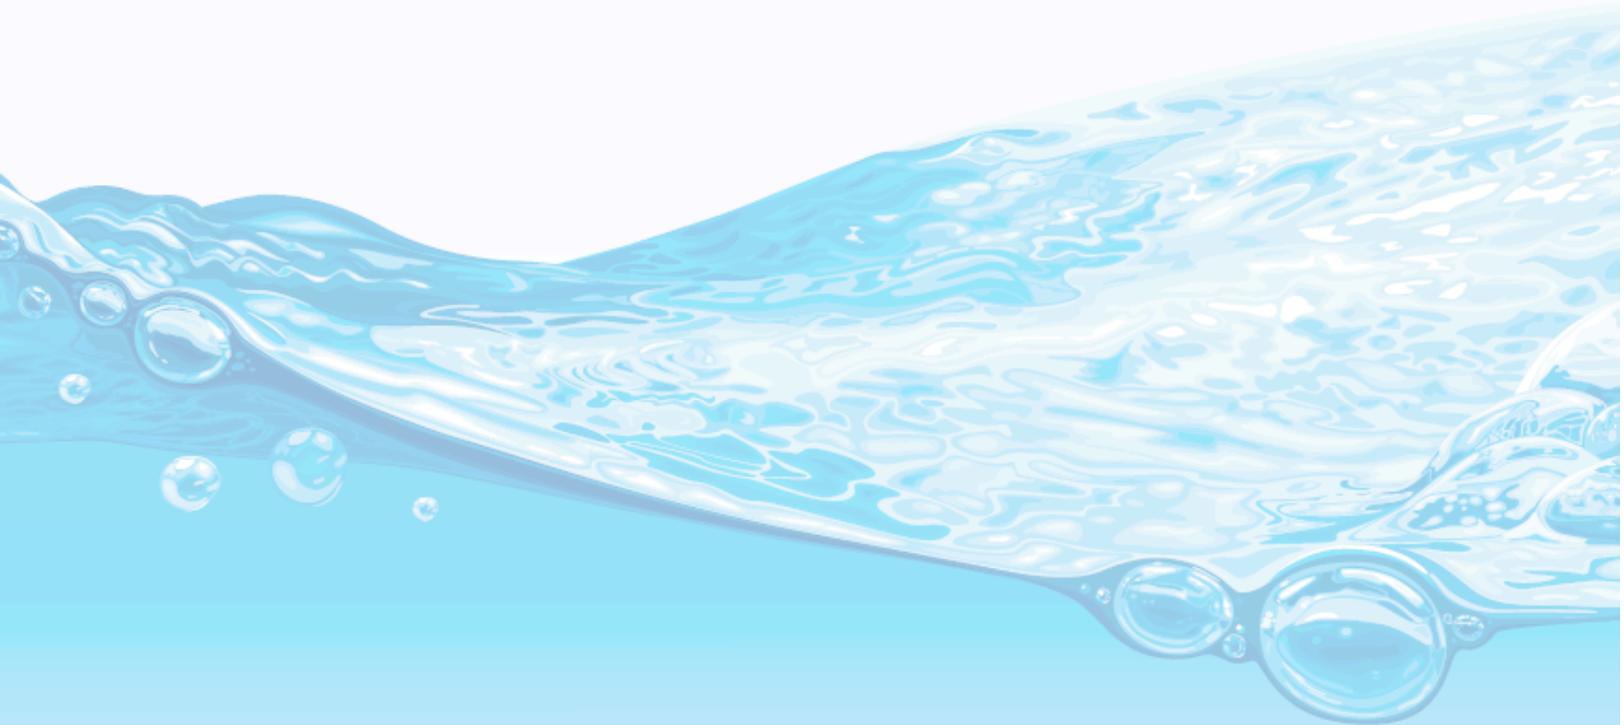

LS-100

Stable liquid blend of synthetic sizing and natural wheat starch.

Pariser has a complete line of products and systems for every cleaning need:

- Laundry chemicals –
Industrial, commercial, institutional
- Water treatment systems –
Boiler, cooling tower, waste water
- Dry-cleaning and wet-cleaning chemicals
- Maintenance chemicals
- Warewashing
- Janitorial supplies
